

Enhancement of the Proprietary Investment Policy and Procedures for a large investment firm in Kingdom of Saudi Arabia

### **The Client**

One of the largest Authorized Persons in Saudi Arabia with equity capital upwards of SAR 1.5 billion and investments across various asset classes

## **Scope and Approach**

Having witnessed a commendable growth period led by a diversified investment strategy, the firm realized that it needed to revamp its investment policy, aligning to its maturing strategy and related practices. The client had multiple investments across various asset classes such as private equity, real estate, mutual funds – equity and debt, IPOs, listed equity and money market liquid products. It was also noted that the existing proprietary policy did not manage to meet all the Capital Market Authority's (CMA) requirements. The new policy sought to cover the regulatory requirements along with enhancements in the investment strategy and appetite by aligning with their business plan.

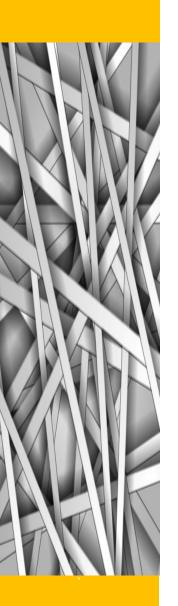

Aptivaa performed a review of the existing policy and the business strategy of the company. A comprehensive policy was developed which included the core pillars of the investment strategy, and related processes, such as the role of control functions, limit management framework, authority matrix, defining the permissible and non-permissible investment, exception management and handling etc. The new policy was formalized as the key driver for investment decisions in the firm and assisted the firm to adhere to the prudential rules related specific requirements.

#### Results

The client was able to enhance their investment policy, achieve regulatory compliance and enhance their investment strategy.

#### **Deliverables**

Proprietary Investment Policy and Procedure

# **About Us**
